| 15.45 – 16.15 | Speech by Ms Joke Schauvliege, Flemish minister of the Environment and holding the Presidency of the Environmental Council |
| 16.15 – 17.15 | Reception - zuilenzaal |

* Umicore is a materials technology group focusing on application areas where it knows its expertise in materials science, chemistry and metallurgy can make a real difference. Umicore generates approximately 50 % of its revenues and spends approximately 80 % of its R&D budget in the area of clean technology, such as emission control catalysts, materials for rechargeable batteries and photovoltaics, fuel cells, and precious metals recycling. Umicore's overriding goal of sustainable value creation is based on this ambition to develop, produce and recycle materials in a way that fulfils its mission: materials for a better life. The Umicore Group has industrial operations on all continents and serves a global customer base. It generated a turnover of € 6.9 billion (€ 1.7 billion excluding metal) in 2009 and currently employs some 13,700 people. (<http://www.unicore.be/en/>)

** In the city of Antwerp we organize a guided tour (English-French) which will include a visit of the Cathedral and to the Plantin-Moretus museum (300 years of printing history). The visit will be concluded with the drinking of a 'bolleke' (a typical Antwerp beer) in a typical Antwerp café. (http://museum.antwerpen.be/plantin_moretus/index_eng.html)

*** The study "Sustainable Materials Management for Europe, from efficiency to effectiveness" (Rossy/Jones/Geysen/Binge 2010) (Sustenuto, KULeuven and the Wuppertal Institute) was commissioned by the Flemish Department of Environment for the Belgian EU Presidency.
